EXPERIENCE

MERN Stack Developer

Freelancer

📅 2024 - 2025 📍 Remote

Collaborated with a senior freelancer on multiple full-stack web applications using the MERN stack.

- Developed and maintained scalable and responsive web applications
- Worked on diverse platforms including Industrial Services Platform, Social E-commerce Platform, Booking System and Employee Management System
- Built RESTful APIs with Node.js and Express
- Designed dynamic user interfaces with React.js
- Integrated MongoDB for data storage and management
- Participated in code reviews and agile development processes

PROJECTS

Al Aish Al Kareem

🔗 <https://alaychalkarim.com/>

A modern Arabic bakery voucher management app built with Next.js 15, TypeScript, and Tailwind CSS.

- Separate dashboards for beneficiaries and bakery owners
- QR code-based voucher scanning and redemption
- Real-time notifications for voucher updates
- Full Arabic RTL support with responsive design
- Secure token-based authentication and offline support

Industradz Platform

🔗 <https://industradzuser.vercel.app>

A full-stack platform connecting industrial service providers with customers through booking, subscriptions, and admin management.

- Designed and implemented role-based authentication and access control (customers, sellers, admins)
- Enabled sellers to register as businesses, purchase subscriptions, and list multiple service categories
- Integrated service discovery based on user location with dynamic filtering and search
- Built booking and appointment scheduling system with real-time availability tracking
- Added chat and interaction features between users and sellers
- Implemented secure payment processing and commission management for the platform

Homeopathy Case Taking Application (PWA)

🔗 <https://asfand-homeo.vercel.app/>

A Progressive Web App PWA designed to streamline case-taking, treatment tracking, and patient management for homeopathic doctors.

- Developed responsive and intuitive PWA for cross-device accessibility
- Ensured secure access to patient records with authentication and data protection
- Enabled secure collection and storage of detailed patient medical histories
- Used React for frontend, Node.js/Express for backend, and MongoDB for database management

SUMMARY

I am a full-stack web developer with strong expertise in both front-end and back-end technologies, specializing in the MERN stack and Next.js. I have worked extensively as a freelance MERN stack developer, successfully delivering several full-scale projects from start to finish. My work has consistently demonstrated a high standard of code quality and user experience, contributing to long-term client satisfaction.
